一、Abstract

This product (LCD006) is applicable to ELPS (low voltage large capacity parallel system) solution, used to cooperate with the ELPS system main transfer board to display the set of parallel information (up to 16 and), such as: PACK operating state, voltage, current, temperature, SOC, alarm and protection, etc.

In order to use the product correctly, please read the user manual carefully and keep it properly for future use.

Please install and operate as required in the user manual.

二、Appearance size

2.1、Dimensional drawing

Definition	Pin#	Description
VCC	1	5V Power Input
GND	2	GND
RX2	3	
TX2	4	
TX4	5	Output
RX4	6	Input

2.2、 Show renderings

三、 Function declaration

3.1、 Interface introduction

1、 Home page

After power-on activation, the battery management interface will be displayed, entering the following figure:

1) Touch  can be switched to Chinese, touch  can be switched to English;

2) Touch  to enter the parameter page of the PACK.

2、The parameter page of the PACK

The current page can see the main parameters of each PACK under this system, as shown in the figure below:

1) Touch  to return to the home page;

2) Touch  to view other PACK parameters, as included in the figure below:

3) Touch  to view the detailed parameters of PACK 1 (Like the other PACK), as shown in the figure below:

4) Touch  to return to the previous page;

5) Touch  /  or  /  to view "alarm" and "protection" information in the following below:

3、 Protocol switch page

1) Touch  to enter the protocol switching page on the home page, as shown in the figure below:

2) Touch  /  can select the agreement, included in the figure below:

3) Touch  to determine and the page jumps back to the home page。
